

PRODUCT DESCRIPTION

This grab bar is a fixture that caters as much in its functionality as it does in its ability to amplify an interior design vision. Unlike its cumbersome counterparts, this grab bar is an elegant and welcome addition to a tastefully conceived powder room or bathroom. The escutcheon-less design imbues sophistication while a fluted profile provides a tactile and secure grip. The polished nickel finish boasts a warm luminosity compared to other cool-tone metals. While other offerings disrupt and overwhelm the spaces they occupy, this grab bar serves to enrich any surface and room it graces.

MATERIALS (FINISHES)

Stainless Steel, Polished Nickel-Plated Aluminum.
