PRODUCT DETAILS

MATERIALS

Smooth full grain leather

Brass, Stainless Steel

DIMENSIONS

Projection: 1-1/8" (28mm)

Width : 2.25" (57mm)

LEATHER COLOUR OPTIONS

Taupe , Olive , Chocolate Brown , Natural , Black , Whiskey Brown,

METAL FINISH OPTIONS

Satin Brass, Raw (unlacquered) Brass, Polished Brass, Weathered Brass, Blackened Brass, Brushed Stainless Steel, Polished Stainless Steel

FINISH DESCRIPTIONS

POLISHED BRASS

Our polished brass finish offers a classic, timeless appeal, enhancing any space with its warm, golden hue. To maintain its lustrous shine, simply wipe with a soft cloth dampened with mild soap and water, then dry thoroughly. Over time, expect a subtle patina to develop, adding character and depth to the metal's appearance with regular use.

SATIN BRASS

Our classic satin brass finish adds a refined touch to any setting. To keep its matte brushed texture looking its best, simply wipe with a soft, dry cloth to remove fingerprints and smudges.

RAW (UNLACQUERED) BRASS

With an authentic, living finish, our raw brass develops a rich patina over time, creating a unique, lived-in look. To preserve its raw beauty, avoid harsh chemicals and abrasive cleaners, opting instead for a gentle polish with a brass cleaner as needed. Embrace the evolving nature of this finish as it matures gracefully with age, adding warmth and personality to your decor.

WEATHERED BRASS

Our Weathered brass patina finish captures the essence of vintage charm, featuring darker hues, natural-looking variations in colour and texture. These features create a look of age and natural tarnish without waiting for it to happen naturally over time. To maintain its distinctive appearance, gently dust with a soft cloth or brush to remove surface debris.

BLACKENED BRASS

Our Blackened Brass patina has a deep dark and rich colour with a slightly matte appearance. This uniform finish will maintain its consistency throughout use with proper care and maintenance. For routine care, clean with a mild detergent and water using a soft cloth or sponge, then dry thoroughly to prevent water spots.

BRUSHED STAINLESS STEEL

To uphold its appearance, gently clean with a non-abrasive cleaner and soft cloth, followed by thorough drying to prevent watermarks.

POLISHED STAINLESS STEEL

Durable and versatile, our polished stainless steel finish offers lasting beauty and functionality. For routine care, clean with a mild detergent and water using a soft cloth or sponge, then dry thoroughly to prevent water spots. With time and usage, the stainless steel may develop minor scratches and marks, adding to its industrial charm while maintaining its sleek appearance.

MATERIAL & CARE

METALS

All metal finishes are supplied with a protective coating, unless specified as "raw" or "unlacquered". Suggested care and maintenance is listed below:

- Clean with a soft, damp cloth and mild soap if needed.
- Avoid use of abrasive cleaners or aggressive scrubbing.

As with any natural material, metal finishes will patina over time with use.

Unlacquered and raw metal finishes are designed to naturally age and will change in appearance more dramatically over time. The same methods of care should be followed as other metals, however our unlacquered and raw finishes should be kept dry to avoid staining or severe discolouration.

WOOD

All wood finishes are supplied with a protective coating. As with any natural material, wood will patina over time with use. Suggested care and maintenance is listed below:

- Clean regularly with a soft, damp cloth to avoid dust build up. Use mild soap if needed.
- Dry thoroughly after cleaning and avoid prolonged exposure to moisture.
- Avoid use of abrasive cleaners or aggressive scrubbing.

The wood portion of our handles may be periodically conditioned with a natural wax. Always patch test products before applying to a large surface. For handles with wood and leather, be careful to avoid exposing the leather to any wax that may cause discolouration.

Solid woods have natural colour variations and unique grain patterns that characterize the natural beauty of the material.

LEATHER

All of our products are made from high quality, full-grain leather. The leather has a smooth, matte surface and is available in a range of deep, rich colours. With proper use and care, leather ages gracefully. With regular use, it will naturally soften and darken slightly, developing patina as it ages.

Clean gently with a soft, dry cloth. You may periodically nourish the leather with a wax/silicone-free conditioner. Always perform a patch test before full application as it may alter the leather's colour.

Contact with oily substances may discolour or change the appearance of the leather.

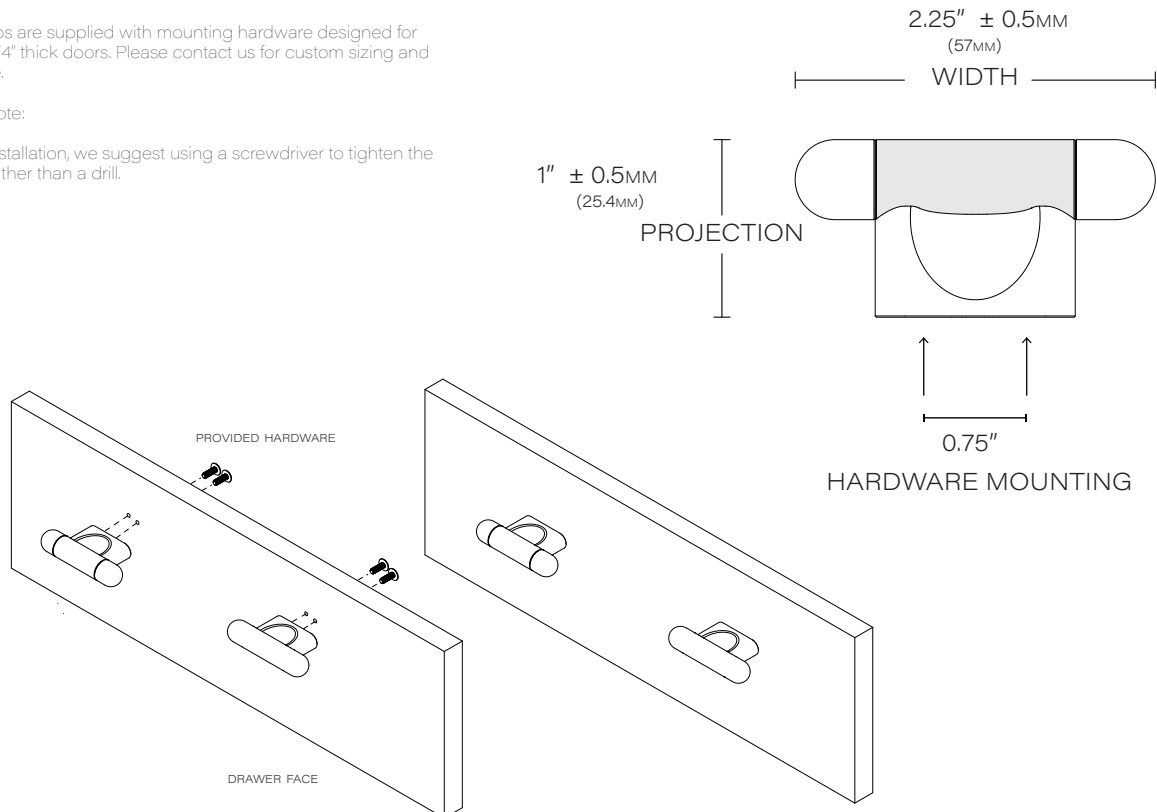

Due to the natural variation of leather hides and the finishing processes, slight colour variations may occur from batch to batch. To ensure consistency, we suggest ordering all handles for a project at the same time. If viewing online, colours may appear differently from screen to screen. Leather swatch sets can be purchased from our online store.

INSTALLATION

Our Knobs are supplied with mounting hardware designed for use on 3/4" thick doors. Please contact us for custom sizing and hardware.

Please Note:

During installation, we suggest using a screwdriver to tighten the screws rather than a drill.
