

Lever Handles

Lever handles are available in 4 different shapes. Each handle is designed to best showcase the natural expression of the brass casting and can be combined with an interchangeable plate for a range of possible combinations to fit any aesthetic. Separately, we offer a range of latches that can be fitted on any door.

Standard Set includes:

- Lever handle
- Plate
- Mortise lock kit
- Brass minus screws

* The mortise lock kit does not come with a lock mechanism cylinder. If you need a lock such as for a bathroom, you need to purchase the latches separately.

Sold separately:

- Latches

Installation:

These levers are designed for wood and wood composite doors only.

For installation, the minimum door thickness is 33mm. The measurement of the backset is 63.5mm. Professional installation is recommended.

Lever Handles

Combine a selection from 4 types of levers and 3 types of plates. * The dimensions indicated are for the handles.

[Lever Handle] Hexagon + [Plate] Circle
w136 x h19 x d55.5mm Code LH-RM
