HEWI Colours compared with RAL and NCS

HEWI Colours have been classified by RAL and NCS and allocated the nearest possible colour classification. Identical colours do not exist in the RAL and NCS systems. In cases where HEWI colours and the colour classification differ too greatly, no classification appears in the table.

Personal colour comparison should still be performed.

HEWI Matt edition

The colour values of LRV, RAL design, RAL standard and NCS colour sample refer to surfaces made of polished polyamide. For matt surfaces (matt edition) there may be deviations.

Due to printing process colours shown may differ slightly from the product.
