Painted Outlet light almond insert
(square corners)

PAINTED OUTLETS

Painted Outlet plates are available with square or radius corners. Painted Outlet plates are etch-primed, ready to be painted onsite. When pairing them with our Painted Lightswitch range, we recommend square corners to match the corners of the switch plates. If you are pairing them with other finishes, you can choose whether you prefer the softer more traditional look of the radius corners, or the more defined square corners.

Junction boxes must be recessed below the finished wall surface by at least 1/8". See our Junction Box Assembly Diagram [technical sheet](#). Technical sheets are available from the [Technical Section](#) of our website.
