

SPACES WITHIN

SCULPTURAL HARDWARE

JEWELRY FOR SPACES

SPACES WITHIN creates sculptural hardware, conceived in Stockholm and crafted from solid recycled brass at a second-generation foundry in Florence, where traditional craftsmanship meets contemporary design. Exploring themes of refinement, elegance, and poetic restraint, each piece holds a distinct character, while the collection as a whole invites freedom of styling and creative expression. Silhouettes and finishes can be paired and composed to bring elevation, rhythm, and a sense of individuality to interiors. The result is a system that feels both curated and personal, adaptable to different architectural contexts without losing its integrity. Jewelry for spaces, in every sense: intimate objects that invite interaction, elevate the everyday, and reveal their beauty slowly, through use and time.

OVERSIZED KNOB / APPLIANCE PULL
GRANDE BLUNT

DIM MM: L 80 x W 30 x D 45
DIM IN: L 3,15 x W 1,18 x D 1,77
WEIGHT: 377g

GRANDE BLUNT is a generously oversized knob with a bold, grounded presence. Designed for large drawers, cabinets, wardrobes, and as an appliance pull, it offers a steady grip and strong visual weight. It pairs beautifully with the BLUNT range and other styles across the collection.

KNOB
BLUNT

DIM MM: L 45 x W 20 x D 32
DIM IN: L 1,77 x W 0,79 x D 1,26
WEIGHT: 98g

BLUNT is shaped as a balanced oval, reduced to a clear and confident form. Classic in character yet refined in proportion, it brings a quiet sense of ease to any space. As one of the most established pieces in the collection, it reflects the core of our design language and material expression.

MINI KNOB

PICO BLUNT

DIM MM: L 30 x W 18 x D 27
DIM IN: L 1,18 x W 0,71 x D 1,06
WEIGHT: 51g

PICO BLUNT is a neat mini knob designed for smaller cabinetry, furniture, and top cabinets. Its reduced scale brings a quiet, paired back expression while maintaining the same confident form. It pairs naturally with the BLUNT range and complements other styles across the collection.

HANDLE
LUNA

DIM MM: L 85 x W 15 x D 40
CC MM: 76
DIM IN: L 3,35 x W 0,59 x D 1,58
CC IN: 3
WEIGHT: 97g

LUNA is a gracefully shaped pull defined by a sculpted arch and compact proportions. Neat in scale yet rich in detail, its gently rounded top introduces a subtle softness to the form. The silhouette brings a sense of movement and refinement to any surface.

HANDLE / APPLIANCE PULL

DOYEN

DIM MM: L 230 x W 12 x D 73
CC MM: 192
DIM IN: L 9,06 x W 0,47 x D 2,87
CC IN: 7,56
WEIGHT: 300g

DOYEN is a prominent handle defined by an elegantly slanted curve. Its generous scale gives it a confident, sculptural presence. Well suited as an appliance pull for built in appliances, it also works beautifully repeated on tall cabinet and wardrobe doors.

PULL
SAGE

DIM MM: L 65 x W 28 x D 27
CC MM: 45
DIM IN: L 2,56 x W 1,10 x D 1,06
CC IN: 1,77
WEIGHT: 255g

SAGE is shaped with a sculpted rectangular form and gentle curves. Calm and balanced in expression, it works beautifully mounted horizontally on drawers or vertically on cabinet doors. Understated yet distinctive, SAGE brings a quiet elegance to any space.

SUAVE

DIM MM: L 172 x W 12 x D 35
CC MM: 160
DIM IN: L 6,77 x W 0,47 x D 1,38
CC IN: 6,3
WEIGHT: 130g

SUAVE is a subtly sculpted handle with an off centre curve that creates a dynamic slant. Versatile in use, it works beautifully on large drawers, cabinets, wardrobe doors, and as a handle for built in kitchen appliances. It can also be placed mirrored on paired doors.

MINI PULL
BURLY

DIM MM: L 50 x W 12 x D 25,5
CC MM: 39
DIM IN: L 1,97 x W 0,47 x D 0,98
CC IN: 1,53
WEIGHT: 50g

BURLY is an understated yet dynamic pull, defined by a sturdy design in a fluid, light proportion. The concave interior detail adds a sensuous tactility, inviting touch. Beautiful mounted both vertically and horizontally on cabinets and drawers.

LIVING FINISHES

All our finishes are living finishes. Uncoated by design, they are meant to evolve over time through touch, everyday use and exposure to the environment. Changes in tone, patina, and surface are natural and intentional, allowing each piece to develop a character unique to the space it inhabits. Patina is not a defect, but an intentional part of the design. Like time-worn jewelry, our hardware records the passage of time and use. The pace and character of this transformation depends entirely on handling and the surrounding environment, with no fixed timeline.

DARK BRASS

Dark Brass is a matte finish artisanally pre-aged to evoke the depth of brass darkened over decades. Over time, untouched areas will darken further, while frequent use will gradually reveal lighter brass tones beneath, just as with naturally aged and darkened brass. With heavy use, touched areas may also become smoother and more polished, creating a natural contrast between light and dark.

Care:
If the surface becomes wet or oily, dry immediately with a soft cloth. Do not polish or use detergents, as this may change the character of the finish.

AMBER BRASS

Amber Brass is a matte finish in a warm tone with a softly aged appearance from the outset. As it patinates, the tone will deepen and develop natural variation. Areas of frequent touch will slowly become smoother and slightly more polished, while untouched areas remain matte, revealing the material's evolving character.

Care:
If the surface becomes wet or oily, dry immediately with a soft cloth. Do not polish or use detergents, as this may change the character of the finish.

POLISHED BRASS

Polished Brass begins bright and reflective and gradually deepens to a warmer, darker tone over time. With continued use, the surface becomes less glossy and more matte, creating a naturally lived-in patina.

Care:
If the surface becomes wet or oily, dry immediately with a soft cloth. Do not use detergents, as this may change the finish's character. If a brighter finish is desired, polished brass can be repolished using a suitable metal polish to restore its sheen and tone.

SATIN NICKEL

Satin Nickel has a soft, satin-matte surface from the outset. Over time, areas that are less touched may darken slightly, while frequent use can gently polish the surface, giving it a smoother and more reflective appearance.

Care:
If the surface becomes wet or oily, dry immediately with a soft cloth. Do not polish or use detergents, as this may change the character of the finish.

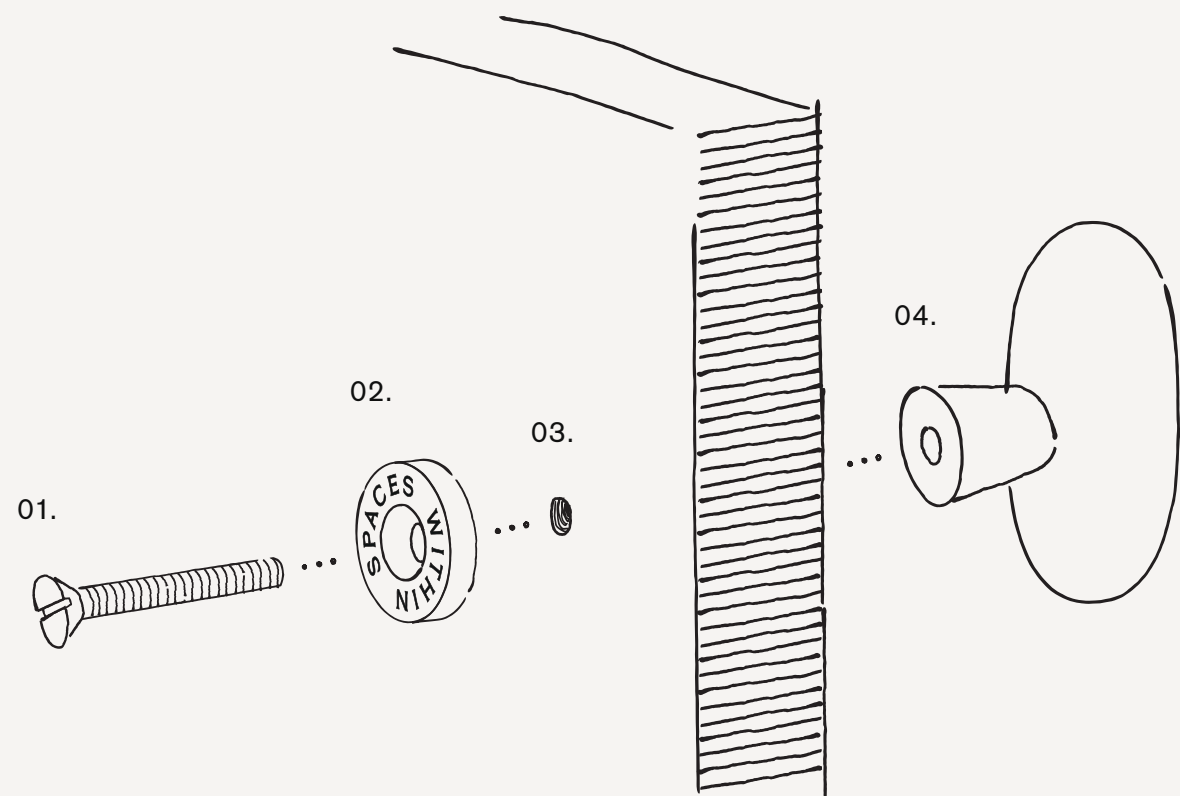

POLISHED NICKEL

Polished Nickel features a bright, mirrored surface that will gradually soften over time. Areas that are less frequently touched may darken slightly, and with continued use the polished surface can become more matte, creating a subtle, lived-in character.

Care:
If the surface becomes wet or oily, dry immediately with a soft cloth. Do not use detergents, as this may change the finish's character. If a brighter finish is desired, polished nickel can be repolished using a suitable metal polish to restore its sheen and tone.

INSTALL

- .01 **SCREW**

Select the suitable screw length.
All hardware are delivered with two
M4 screws, lengths 25mm & 30mm.
- .02 **WASHER**

Place the washer on the back side.
The washer adds stability, prevents
rotation and protects the cabinetry.
- .03 **HOLE**

Pre-drill a 4mm hole.
- .04 **HARDWARE**

Place the hardware on the front
side of the cabinetry.
